

HORSE TONGUE

Characteristics.

Odor:	Fresh meat.
Texture:	Firm.
Color:	Pink colored.
Aprox weight:	400 to 600 grs

Description

The tongue is a strong muscle moving the feed between the different departments of the mouth. It is very sensitive although covered by a thick mucosa. A groove is apparent between the inner part of the tongue which is connected to the underlying tissue and the free part of the tongue in the front
